This information and our technical advice – whether verbal, in writing or by way of trials – are given in good faith but without warranty, and this also applies where proprietary rights of third parties are involved. Our advice does not release you from the obligation to verify the information currently provided – especially that contained in our safety data and technical information sheets – and to test our products as to their suitability for the intended processes and uses. The application, use and processing of our products and the products manufactured by you on the basis of our technical advice are beyond our control and, therefore, entirely your own responsibility. Our products are sold in accordance with the current version of our General Conditions of Sale and Delivery.

Trial Products (grade designations beginning e.g. with the codes DP, TP, KL or KU) are sales products at the developmental stage. For this reason, no assurances can be given as to grade conformity, processability, long-term performance characteristics or other production or application parameters. No definitive statements can be made regarding the behavior of the product during processing or use. The purchaser/user uses the product entirely at his own risk. The marketing and continued supply of this material are not assured and may be discontinued at any time.

**X Durethan®**

# HIGH PERFORMANCE MATERIALS

## Plastics with growth potential

Durethan® and Pocan® are plastic materials on the rise, offering outstanding potential for growth and innovation. Thanks to our efficient production facilities and intensive product and application development, we are one of the most competitive providers in the field.

The production of Durethan® and Pocan® is further supported by our manufacture of strategically relevant pre-production products. Our facilities in Krefeld-Uerdingen and Antwerp, among the largest of their kind, produce caprolactam and glass fibers on a global scale.

## Industries and areas of application

Durethan® has a property profile that makes it ideal for applications in the automotive and electrical/electronics industries and in the construction sector.

Pocan® is used primarily in the electrical/electronics industry, although applications for this versatile material can also be found in the automotive and commercial vehicles industry, in medicine, and in the sports and leisure sectors.

### Key brands and products:

**Durethan®:** Engineering resins based on polyamide 6, polyamide 66 and co-polyamides

**Pocan®:** Engineering resins based on polybutylene terephthalate

**Tepex®:** Continuous fiber reinforced thermoplastic composite sheets

**HiAnt®:** Engineering expertise and joint promotion of innovation

# THE POWER OF INNOVATION

## HiAnt®

In the development of innovative applications we support our customers with extensive technical service and know-how. The name HiAnt® stands for our expertise in this area. It is derived from the words "high-tech" and "ant". Ants are renowned for their well-organized teamwork, industriousness, interlinking through effective communication, and success through combined effort.

### We make a distinction between the following key areas:

**HiAnt® material development:** Tailored material to satisfy demanding customer requirements.

**HiAnt® concept development:** Leadership in lightweight technology to drive evolutions.

**HiAnt® Computer Aided Engineering:** Top-notch simulation methods for exact prediction of component performance.

**HiAnt® part testing:** State-of-the-art testing facilities for practice-oriented component qualification.

**HiAnt® processing:** Development of material-process combinations to enable new applications.

## DURETHAN® COLOR NOMENCLATURE

Durethan® is available in a large number of colors. We use a six-digit number to precisely characterize the color, which follows on after the grade designation. The first two digits specify the color class, while the remaining digits are used for administrative purposes in the color laboratory. The material's natural color generally has the designation "000000".

Color class	First two digits
NATURAL	00
WHITE	01
YELLOW	10
ORANGE	20
RET	30
PURPLE	40
BLUE	50
GREEN	60
GRAY	70
BROWN	80
BLACK	90

**Example: Durethan® BKV 30 H3.0 000000: natural color**  
**Durethan® BKV 30 H2.0 901510: black**
